

# Riverside Quay Community Newsletter

**2 RIVERSIDE  
QUAY** MELBOURNE

Welcome to the latest edition of the 2 Riverside Quay Community Newsletter.

## Progress update

The builders hoist at the southern end of the site has been successfully installed, and the jump form at the western end of the site is in place. At the eastern end, formwork, reinforcing and concrete pouring of the first level of core walls has been ongoing.

## Western End

The area will shortly be backfilled before the completion of footings, at which stage the mega column and infill slab works will commence. The core walls for the lift shafts will continue to be formed and poured inside the jump form.

## Eastern End

The construction of footings around the lift shaft walls will continue, and the jump form system will be set up.

## Rooftop

Preparations are under way for the installation of safety screens on all four elevations of the rooftop, and concrete works for the vertical shear walls will commence. The old lift cars and associated plant will be removed, which will involve some cutting and demolition.

A safety gantry will be installed between Buildings Q1 and Q2 and over the northern pedestrian entrance to the car park this Saturday, 23rd May. Monday 25th May is an RDO.

## Road Closures

There may be partial road closures in place along Riverside Quay next week in order to allow for a safety exclusion zone while screen installation works take place on the rooftop. Traffic management will be in place.

## Community Engagement

Over the last two weeks, the Community Engagement team at Capire have been hitting the pavement at Riverside Quay speaking with people who live, work or are visiting the area. We would like to thank the 210 people who stopped to have a chat and answer the short survey. These survey responses are important in informing the development of the master plan. The Capire team is currently planning for a community workshop in the next month, if you would like to attend or find out more please check out the website at [riversidequayplacere renewal.com](http://riversidequayplacere renewal.com)

As always, if you have any queries in relation to the development please contact us on 03 9695 9888 or by emailing [riversidequay@mirvac.com](mailto:riversidequay@mirvac.com)
